

Architectural Control Guidelines

Red Rock Ranch Re-subdividing:

Red Rock Ranch proposes an open view of the area. A rural appearance is desirable. Most fencing will not keep deer, mountain lions, bear, skunks or fox out of your lot. This is a Wildlife/Urban interface area and wildlife should be expected to share our properties.

The covenants state no lot shall be re-subdivided. The covenants were established with original lot lines of 1997.

Lots may not be subdivided into smaller lot sizes or parts of lots, past this configuration.

ADJOINING 71000 & 71084
